## SOP Inspection Report

### BIO-GEL: HIGH SHEER CLING, REDUCES ODORS, AND IMPROVES DRAIN FLOW

- Apply with compressed air-manual sprayer (read directions before use)
- Floor tile surfaces (missing, broken, and cracked grout and tiles)
- Baseboards from floor to wall junction surfaces
- Beverage supply line housings through counter top and underneath floor
- Beer tap and soft drink tap drain trays, supply line tube exteriors, and drain line covers

Pour

### BIO-GEL PRO KLEEN: MOP WATER DILUTION FOR FLOOR SURFACE MOPPING

- Mix 2 to 6 ounces per 1 gallon of warm mop bucket water (read directions before use)
- Apply to floor surfaces via daily maintenance scheduled mopping
- Reduces oily deposits on floor surfaces to limit chance of slips and falls
- Pour used dilution down various drains to supplement drain cleaning

MOP WATER ADDITIVE

### BIO-GEL PRO FOAM: HIGH EXPANSION FOAM FOR RECESSED AREAS

- Apply with RTU foaming trigger or other foaming equipment (read directions before use)
- Floor level surfaces under food service lines (equipment wheels-caution near electrical)
- Drain line drip pipes above floor drains
- Baseboards along perimeter areas
- Wall surfaces behind food service lines
- Slop sinks surfaces and drains
- Floor drains (including covers, interior baskets, vaults, and interior line circumference)

Spray

Foam

### BIO-GEL PRO DOSE: AUTOMATED IN-LINE INJECTION SYSTEM

- Runs on 110 v AC or battery power (read directions before use)
- Dose timer programming
- Available in pail mount (shown as picture) and wall mount version
- Calibrated application of Bio-Gel into drains, grease traps, elevator pits, sumps, etc.

## DUMPSTERGUARD: EXTERIOR & INTERIOR REFUSE AREAS

- Apply with compressed air-manual sprayer (read directions before use)
- Exterior dumpsters (inside, outside, underneath, lid, pad, and enclosure surfaces)
- Trash containers, garbage cans, and recycle bins (inside and outside surfaces)
- Exterior grease collection vaults (exterior, pad, and enclosure surfaces)

## TOP TIPS FOR USING THE BIO-GEL RANGE:

- Read product directions before use
- For best results, apply daily over 2 weeks, and then weekly maintenance
- Clean floor, sink, and beverage drains with color-coded brushes before applications

**Best of 100% Sanitation Report Score:**  % Satisfactory  Unsatisfactory

Check each item as satisfactory or unsatisfactory. Deduct one point for each unsatisfactory item.

A score of less than 85% is considered unsatisfactory.

| Sanitation  | Satisfactory | Unsatisfactory |
|---|--------------|----------------|
| <b>Exterior</b>   |              |                |
| 1. Dumpster/refuse areas free of debris   |              |                |
| 2. Dumpsters free of organic materials adhering to surfaces   |              |                |
| 3. Walls of dumpster/refuse enclosures free of debris/organic materials   |              |                |
| 4. Soiled interior garbage cans stored outside (on cleaning schedule)   |              |                |
| 5. Debris on ground picked-up and areas washed down   |              |                |
| 6. Malodors not present at dumpster areas (no-notice at nearest entry)  |              |                |
| <b>Interior</b>   |              |                |
| 7. Floor drains at max flow-rates and free of malodors/organic debris   |              |                |
| 8. Sink drains at max flow-rates and free of malodors/organic debris  |              |                |
| 9. Grease trap(s) <input type="checkbox"/> interior <input type="checkbox"/> exterior <input type="checkbox"/> none<br>(location _____) |              |                |
| 10. Grease trap(s) pumped-out and cleared on a provider schedule  |              |                |
| 11. Grease trap(s) pumped-out <input type="checkbox"/> /year  |              |                |
| 12. Floors not sticky or slippery ( <input type="checkbox"/> sticky/ <input type="checkbox"/> slippery)                                 |              |                |
| 13. Floors mopped on a daily maintenance schedule   |              |                |
| 14. Buckets and mops rinsed daily and stored in a suitable location   |              |                |
| <b>Interior Drainage</b>  |              |                |
| 15. Discretion covers for drip lines free of organic materials  |              |                |
| 16. Beer tap and soft drink tap drain lines at max flow-rates   |              |                |
| 17. Beer and soft drink supply lines and drip trays clean   |              |                |
| 18. Drip trays cleaned at end of every shift  |              |                |
| 19. Drip lines/tubes cleaned once per week  |              |                |
| <b>Interior Floor Coverings</b>   |              |                |
| 20. Flooring serviceable (concrete, tile, linoleum, wood, etc. (_____))   |              |                |
| 21. Flooring has no cracks or breaks  |              |                |
| 22. Grout not discolored due to moisture retention (mold)   |              |                |
| 23. Tiles not broken or missing   |              |                |
| 24. Baseboards not broken or cracked  |              |                |
| 25. Rubber mats cleaned daily   |              |                |
| 26. Rubber mats free of debris/organic matter   |              |                |
| <b>Interior Areas</b>   |              |                |
| 27. Undersides of prep stations, sink-stands, and shelving clean  |              |                |
| 28. Mop/broom closet ventilated and free of debris/organic matter   |              |                |
| 29. Basement/storage areas free of standing water/debris/organic matter   |              |                |
| 30. Sump basins and elevator pits have no standing water/malodors   |              |                |
